Skills

HTML5, CSS3, JavaScript, jQuery ES6, GitHub. I am extremely proficient at adapting to new high stress and fast paced work environments while managing large teams.

Projects

- **National Park Travel Blog**
  - A National Parks and Weather application that allows users to post blog reviews.
  - **National Park Travel Blog**

- **Date Night App**
  - I created an application that randomizes a meal and cocktail based on user input. I built this application with three other coders. Date Night utilizes JavaScript, JQUERY, HTML5, CSS, and Materialize.
  - **Date Night Application**

- **Weather Dashboard**
  - Using Open Weather API's I created an application that gathers current and five day forecast based on user input. I built this application primarily using JavaScript, jQuery, and Bootstrap.
  - **Weather Dashboard**
  -

- **Work Day Scheduler**
  - I created a simple calendar app for scheduling your work day with the use of MomentJS, JavaScript, jQuery, HTML5, and CSS.
  - **Work Day Scheduler**

Coding Certification

UNC Chapel Hill Full Stack Developer Bootcamp 2020
